

Dye Transfer Print Prices

By Digital Mask

Digital Mask offers a Dye Transfer printing service for the most discriminating customers. The quality of the prints produced with this method is unsurpassed, and provides a unique look that is not available with other printing methods. We are using Kodak dyes, and Kodak paper in F, G, and A surfaces (subject to availability).

We use a custom laser film recorder to record the separation negatives onto 8x10" film, and use a Saltzman enlarger to enlarge onto the matrix film. We work from digital files which allows us to use all the tools that Photoshop has to offer. If the image is on film, we will drum scan the film and prepare the final file for printing.

Size	First Print	Additional Prints
16 x 20"	\$ 1,300	\$ 320
20 x 24"	\$ 1,600	\$ 360
24 x 30"	\$ 2,000	\$ 550
30 x 40"	\$ 2,600	\$ 650

Please note that the size specifies the size of the matrix film. The image size will be smaller to accommodate the registration punch holes.

Print sizes smaller than 16 x 20" are priced the same as a 16 x 20" print. Smaller paper sizes are 11 x 14" and 14 x 17".
